

Grading Policy Updates for coronavirus

5th Six weeks grades

Calculated by combining the grades from before spring break from the beginning of the 5th six weeks, with grades earned from home for the weeks of March 23- April 3. Those grades will be figured using the following formula on April 14th.

Completion Grade will be simply the number of assignments completed divided by the number of assignment given. Example your student completed 10 history lessons and received 12 history assignments $10/12 = 83\%$ your completion history grade would be 83.

Online grade will be the average of all assignments given for that class plus 20 points for each assignment up to 100.

Final average will be the Grade from work done at school before break as mentioned with the completion grade and the online grade.

The 6th six weeks will be much easier to compute and will be solely 1 completion grade and 1 online grade averaged to get the final six weeks grade. For the 6th six weeks the grade average earned online will be the grade given. Example an 80 is an 80 a 90 is a 90 a 100 is a 100.

Parents and students thank you for all your hard work. We have tried to reduce assignments and grading however, we are counting the online instruction grades into averages. This work is important and will impact semester and yearly grades.

As always don't hesitate to call or email 325-453-4555 david.odell@rlisd.net 806-433-1410
