

Pioneer Pleasant Vale COVID-19

Update 3/16/20

Parents and/or Guardians of PPV Students,

Based on the information we received today, it has been decided that Pioneer Pleasant Vale School will close school and postpone ALL extracurricular activities through April 5th, 2020. During this time school officials and a limited amount of staff will deep clean and disinfect all school buildings in our district in preparation for a return to normal school routines. Pioneer Pleasant Vale Schools believes that there is nothing more important than the safety and well-being of our students.

Please stay aware and check back to this website over the coming weeks for updates or changes to our schedule. Although we do not know at this time, it is possible that factors concerning the COVID-19 virus pandemic may change, therefore, resulting in a longer break from normal school schedules and activities. Over the next week school administrators will be meeting with state officials and vendors to explore what options are available for our students at home.

Concerning school lunches, we are actively working with the state to participate in a program that would allow our students to continue to get a school meal during this unexpected break. As more information becomes available we will send out more messages to parents via similar statements as this and use our automated calling system.

We will continue to update you as we get more information regarding this topic. Your students' safety and education is our top priority and we will continue to keep you updated as information is provided by the state.
